EMPLOYMENT HISTORY

Ansco & Associates, Norcross, GA — Low Code Developer

March 2021 – Present

Design and build technical solutions based on business needs and drivers. Identify, evaluate, and fix application performance bottlenecks. Planning and managing project development in accordance with Agile methodologies. Communicate directly with project managers and stakeholders. Build flexible data models and seamless integration points for in app usage.

Robins Air Force Base, Houston, GA — Software Engineer Intern

January 2020 – December 2020

Collaborated with experienced cross-disciplinary teammates to design and build innovative products and services for stakeholders. Created solutions to test cases on distributed systems with exposure to innovative technologies while working in an agile environment to deliver high-quality software.

GMZ Web Solutions, Atlanta, Ga — Lead Developer

January 2017 - January 2020

Managed the website creation process from design consultation through launch. Met with clients to discuss wants and needs to ensure deliverables achieve their vision. Acted as the primary point of contact for the client while giving active feedback based off best practices and emerging trends. While always being sure to maintain outstanding customer service.

PROJECTS

Engineering Request Tracking System, Appian Application

Worked as the team lead while utilizing agile software development methodologies to convert a Microsoft Access database into an Appian Business Process Management Application to allow for an increase in visibility of where engineering work is taking place as well as measure project time, project requirements, reduce man hours/cost, and reduced the management efforts.

GSU Movie Database, Web Application

The GSU Movie Database is an easy-to-use movie database similar to IMDB. Users can rate and review movies as well as curate their own top 10 movie list. My team and I utilized Node.js, JavaScript, HTML, MySQL, CSS, Handlebars, and the Bootstrap framework to make this build possible.

EDUCATION

Georgia Southern University, BS Computer Science

Graduated Class of 2020 w/ 3.1 GPA and Deans list from 2019 - 2020

SKILLS

Knowledge of Alfresco, Appian, C#, Excel, Google Scripts, Java, JavaScript, Microsoft Dynamics, MySQL, Outsystems, PHP, Quickbase, VBA

Extensive experience and knowledge in working with the following low code platforms; Appian, Quickbase and Outsystems. As well as professional experience in working with C# and MySQL

Organizations

Huntsman Cancer Foundation – 2016 – Present, Assist in the organization of multiple fundraising events alongside a team of roughly 60 individuals who collectively were able to raise over one hundred thousand dollars two years in a row to donate to help cancer research.

Vice President of Communications – 2017 – Interfraternity Council, worked alongside our president to publicize good deeds, charity events, and other activities going on within the Greek Life community.

Google Developer Student Club at GSU 2019 – 2020 Learned new technologies through google labs and created applications that would better the Georgia Southern University Community
